

Compatibility

Web browsers

Google Chrome

Tested versions

- Version 66.0.3359.181 (Official build) (64bit)
 - Version 70.0.3538.67 (Official build) (64bit)
 - Version 70.0.3538.102 (Official build) (64bit)
-

Firefox

Tested versions

- ~~Version 47.0~~ - supported only for CzechIdM 10.4 and lower
 - Version 63.0
-

Internet Explorer & Edge

For now it isn't possible to use CzechIdM product with IE versions older than IE11.

Tested versions

- IE 11, IE 11.345.17134.0 - **IE 11 is no longer supported.**
- EDGE 84.0.522.59

Known issues

- **Icons and fonts do not work** if your system or IE has downloading of fonts disabled (this is a security setting). You can enable it in IE or system settings (or through the AD domain GPO). See following pictures for how to do that: [System settings](#) or [IE settings](#). [Article about it.](#)
- **Calendar in approval tasks overlaps** the bottom of the page. A scroll bar appears but when working on touchpad without gesture scrolling support there is no way to scroll. As a workaround you can type the date into the text field without using the calendar. This is fixed in newer versions of Edge based on Chromium core.

Apple Safari

- Safari 11.x

Java

IdM as java application require java to work.

Tested versions

- Java JDK 11 for IdM 11 and newer

Application servers

Our product is primary developed and tested on [Apache Tomcat](#) application server. We recommend to use this application server.

Apache Tomcat

Apache Tomcat is currently tested on these versions:

- 8.0.x - **No longer supported.**
- 8.5.x - **No longer supported.** Should still work with CzechIdM 11.0.0. Not works with CzechIdM 12 + due bug in Tomcat.
- 9.0.x - **Mandatory for CzechIdM version 12+**

You can download the Tomcat from [its official webpage](#).

CzechIdM 10 and higher versions **are not** compatible with Apache Tomcat 7.

Known issues

- We don't register any issues with this application server.

JBoss WildFly

Support for WildFly was dropped in CzechIdM 11.0.0.

CzechIdM supported databases

PostgreSQL

PostgreSQL is our first supported databases. CzechIdM application contains all required flyway scripts for run the database.

Tested versions:

- 9.6 - **No longer supported.** Should still work with CzechIdM 11.0.0.
- 10 - **No longer supported.** Should still work with CzechIdM 11.0.0.
- 11

- 12 (recommended)
- 13

Known issues

- We don't register any issues with the PostgreSQL database.

Microsoft SQL Server

Microsoft SQL Server is another supported database. CzechIdM application contains all required flyway scripts to manage the tables inside database. Please follow these [instructions](#) to setup CzechIdM with MsSQL database.

Tested versions:

- SQL Server 2017, version 14, build 14.0.3294.2

Knowns issues

- Filtering by fulltext ID's doesn't work correctly. For example, Events agenda and filter by ownerId and Id (the ownerType filtering works).
- (only CzechIdM versions older than 10.1) Automatic roles by attribute work in MsSQL only when using shorttext (String).
