2025/07/14 20:44 1/4 Compatibility

# **Compatibility**

# **Web browsers**

## **Google Chrome**

### **Tested versions**

- Version 66.0.3359.181 (Official build) (64bit)
- Version 70.0.3538.67 (Official build) (64bit)
- Version 70.0.3538.102 (Official build) (64bit)

### **Firefox**

#### **Tested versions**

- Version 47.0
- Version 63.0

# **Internet Explorer**

 $Last \ update: \ 2019/09/10 \ devel: documentation: compatibility \ https://wiki.czechidm.com/devel/documentation/compatibility?rev=1568128873$ 

For now isn't possible use CzechIdM product with older version than 11.

#### **Tested versions**

- IE 11,
- IE 11.345.17134.0
- EDGE 42.17134.1.0

#### **Know issues**

• Icons and fonts doesn't works: Your system or IE has disabled download fonst (this is security settings). You can enable it by settings IE or System. See the pictures for enble the font behavior: System settings or

IE settings

. Article about it.

### **Apple Safari**

• Safari 11.x

# **Application servers**

Our product is primary develop and tested on application server Apache Tomcat we recommend use this application server.

# **Apache Tomcat**

Apache Tomcat is currently tested on these versions:

- 8.0.24
- 8.0.35

• 8.0.36

Download application server is possible from here.

#### **Know issues**

We dont register issues with the application server.

### JBoss WildfFly

JBoss WildFly isn't currently fully tested, but main functionality works. JBoss WildFly tested versions:

- 10.0.0 (bug with **date time format exception**, for this exists solution with upgrade fasterxml in JBoss libraries),
- 11.0.0,
- 12.0.0.

Download application server is possible from here.

#### **Know issues**

- version 10.0.0 has bug with different version **fasterxml** library. Solutions is replace JBoss fasterxml library with newer (Is recomended use fasterxml library from version 12.0.0),
- from CzechIdM version 8.1.0 is supported loading connectors for ACC module.

# **CzechIdM supported databases**

### **PostgreSQL**

PostgreSQL is our first supported databases. CzechIdM application contains all required flyway scripts for run the database.

#### Tested version:

• 9.2,

- 9.6,
- 10

#### **Know issues**

We dont register issues with the PostgreSQL database.

### **Microsoft SQL Server**

Microsoft SQL Server is second supported tabase. CzechIdM application contains all required flyway scripts for run the database. Please follow these instruction for setup CzechIdM and MsSQL.

#### Tested version:

• SQL Server 2017, version 14

#### **Know issues**

- Filtering by fulltext ID's doesn't work correctly. For example Events agenda and filter by ownerld and Id. On the agenda works ownerType.
- Automatic roles by attribute works in MsSQL only with shorttext (String).
