

Atom

ide

We are using [Atom IDE](<https://atom.io/>) for frontend development with plugins installed:

- linter
- linter-eslint
- react
- linter-bootlint
- atom-bootstrap3
- git-diff-details
- git-diff-popup
- git-plus
- git-status
- line-diff-details
- last-cursor-position
- docblockr

```
$ apm install linter linter-eslint react linter-bootlint atom-bootstrap3  
git-diff-details git-diff-popup git-plus git-status line-diff-details last-  
cursor-position docblockr
```

Tips

- Ctrl+Shift+P Search any function of Atom.
- Ctrl+R Search method in current file.
- **Auto indent** Formatting of selected code (jsx).
