

Systems - office 365: Manage user licenses

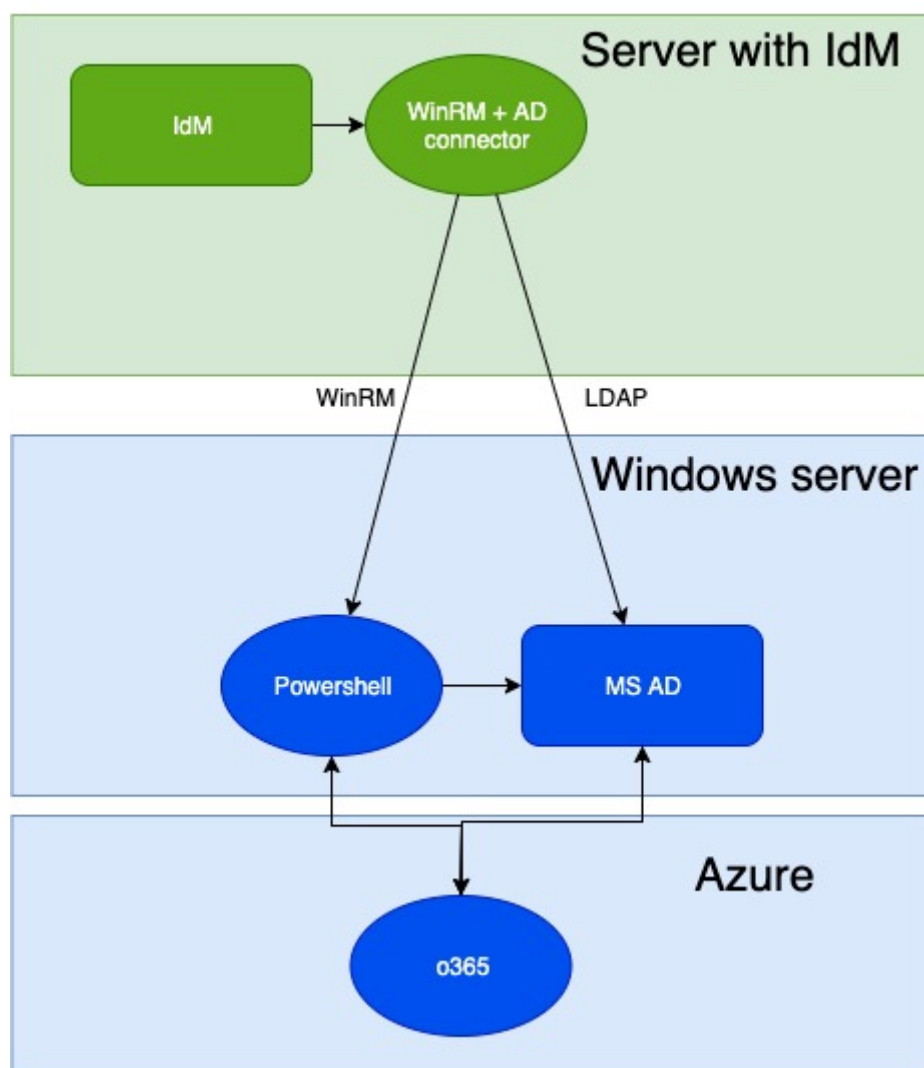

This article is draft!

Introduction

This tutorial will show you how to connect office 365 in order to add or remove licenses to/from users. To achieve this you have two options.

1. Using AD groups to managing licenses - To be able to use AD groups you need to have the right subscription. Look to [documentation](#) for more information.
2. Using WinRM + AD connector and powershell scripts to managing licenses

Before you start

Read the [highlight for managers in our blog](#).

Setup WinRM + AD connector

Please follow these tutorials how to setup remote connector server and connector:

- [Remote Connector server](#)
- [WinRM + AD Connector](#)

adding an office 365 license to user

Návod jak to udělat * předpokládáme napojené AD? pokud ano nějaký odkaz na návod * konfigurace role * jaké scripty použít * jak funguje replikace na azure a jak pomůže retry mechanismus?
