

Groovy Scripts Tips & Tricks

Tips and tricks for writing groovy scripts in CzechIdM.

Be careful, the scripts are not versioned, they serve as an inspiration.

Scripts:

- [Convert objectSID \(byte\[\]\) to String](#)
- [Convert String to LocalDate](#)
- [Custom filter for synchronization](#)
- [Get EAV for users inherited from the organization structure](#)
- [Get identity by personal number \(externalCode\)](#)
- [Get manager of users](#)
- [getFullname - create fullname](#)

Add new "Script" entry:
