

Test: Test scenarios

- Product
- Password change on the target system
- Modules:
 - Certificates
 - Password reset
- Projects

Draft, here's a list of some new test cases:

SYNCHRONIZATION

- (TC 80) Identities: initial synchronization from a CSV file (zero state in IdM)
- (TC-69) Tree-nodes: initial synchronization (zero state in IdM)

SETTINGS

- (TC-73) Generators: adding a new rule (login generator)
- (TC 79) Automatic roles: creating a new one (by tree-structure)

ROLES

- (TC 102) Roles: changing the main definition
- (TC 103) Role-related forms: order of attributes
- (TC-75) Roles: Adding a new one manually
- (TC 91) Guarantor: manually assigning a user to guarantee a role
- (TC 82) Role request: creating a concept (for oneself)
- (TC 83) Role request: creating a request (for oneself)
- (TC 87) Roles: incompatibility setup
- (TC 88) Roles: business roles setup
- (TC 89) Role request: creating a request (for someone else)

AUTOMATIC ROLES

- (TC 79) Automatic roles: creating a new one (by tree-structure)
- (TC 79) Automatic roles: creating a new one (by tree-structure)
- (TC 105) Automatic roles: creating a new one to be assigned according to an attribute, including a sub-definition

ROLE REQUESTS

- (TC 99) Role request: approval process configuration
- (TC 100) Role request: copying from another user
- (TC-90) Role request: removing the existing roles + approval

CONTRACTS

- (TC-2) New contract for a user (main position)

PROVISIONING

- Identity provisioning

PASSWORD

- (TC 93) Password: changing the existing policy
- (TC 95) Password: verifying a valid password according to the new policy
- (TC 96) Password: trying to change password before the set pwd age
- (TC 97) Password: blocking a user after x failed login attempts
- (TC 98) Password: verifying that it is different from x past passwords
- (TC 107) Password: changing it for other systems
